

As a <role>, I want <feature> so that <reason>.

User Story:

As a user, I want my dietary restrictions to be saved in my user information.

Description:

When an user first sign up to this account, the user will have to fill in a mandatory survey, which will include the dietary restrictions. So if the user is vegan, the user will click the vegan option. In the future, the system in the dietary section will automatically generate he vegan restaurant. However, if today there is no vegan option around the area, the system will choose the restaurant that has a vegan option.
